

This document combines all eight section checklists from the Digital Life & Cyber Estate Planning Guide into a single fillable PDF. Individual section PDFs are also available for focused work.

How This Guide Works

The original GYST checklist by Chanel Reynolds covers essential legal, financial, and personal planning. **This guide is a companion**, not a replacement. It focuses specifically on the digital, cyber, and online dimensions that have exploded in complexity since 2013.

The guide is organized into two major sections: **BEFORE** (planning ahead) and **AFTER** (navigating loss). Go at your own pace. Getting even one thing done is progress.

Path A: Planning Ahead

- A-01 -- Account Inventory Checklist
- A-02 -- Password & Access Plan
- A-03 -- Platform Legacy Settings
- A-04 -- Digital Executor Designation
- A-05 -- Specific Digital Scenarios (crypto, smart home, photos)
- A-06 -- Identity Theft Protection
- A-07 -- Immediate Priorities (first 48-72 hours after a loss)
- A-08 -- Ongoing Actions (weeks to months after a loss)

Path B: Navigating Loss Without a Plan

- B-01 -- The First Few Days
- B-02 -- Discovering the Digital Footprint
- B-03 -- Getting Into Locked Accounts
- B-04 -- Understanding What Platforms Allow
- B-05 -- Finding the Right People to Help
- B-06 -- Making Sense of the Financial Picture
- B-07 -- The Emotional Weight of Digital Belongings
